TECHNOLOGY FOR POWER AND LOCOMOTION

Trade Promoters Limited, established in 1976, is the authorized sole distributor in Sri Lanka for Schindler (elevators and escalators), Cummins Inc. (diesel generators and engines for marine, construction and industrial applications), and MPSsystem (automatic car parking systems).

TPL's Head Office, Workshop, Parts Centre and Training Centre are located in Malabe, Sri Lanka. With over 200 employees, TPL has built an image and reputation as a technically competent, innovative and trustworthy organization. TPL takes pride in its 30-year relationship with Schindler.

In its 140-year history, the Schindler Group has grown from a local manufacturer of machines into a global elevator and escalator business.

Today, Schindler is one of the world's leading providers of elevators, escalators, and moving walks. Schindler manufactures, installs, services and modernizes elevators, escalators and moving walks for almost every type of building requirement worldwide, defining best practice as a mobility provider. The company specialises in the latest-technology engineering, as well as mechanical and microprocessor technology products designed and rigorously tested for safety, comfort, efficiency and reliability.

Our Product Range

Elevators

For any individual need in the market, Schindler provides an appropriate elevator solution. Schindler products can be found in many well-known buildings throughout the globe, including office buildings, airports, and shopping centres/retail establishments.

We provide:

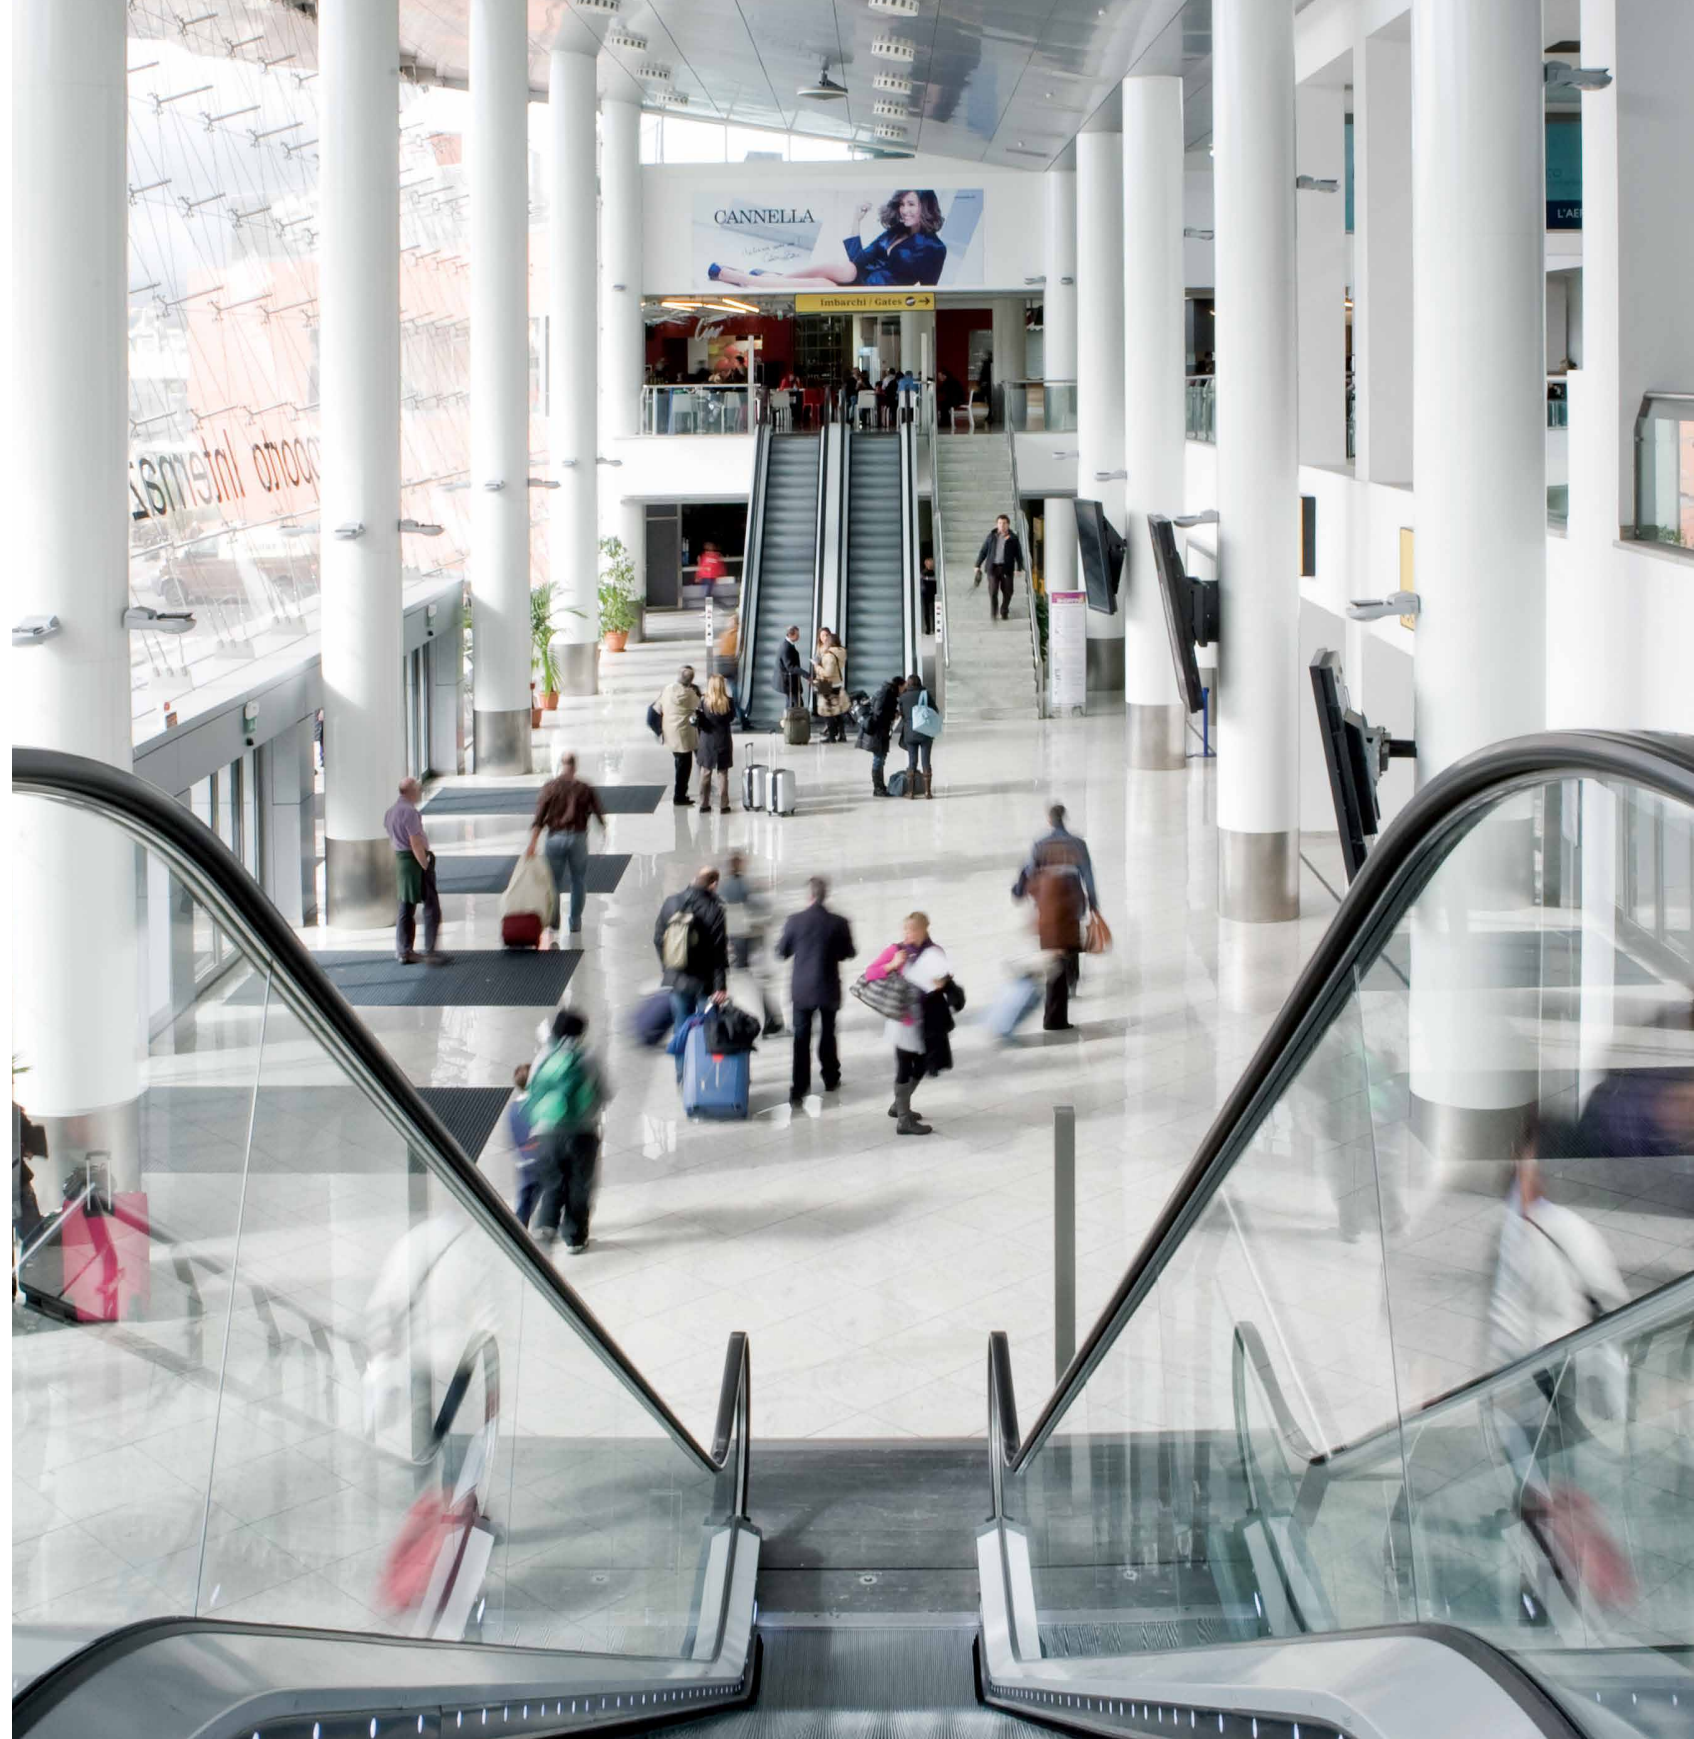

- Low-rise requirements for basic transportation needs at affordable costs
- Mid-rise applications for the residential and commercial market segments
- High-rise requirements for the commercial market segment

Escalators

Our escalators provide safe, reliable and eco-friendly mobility in shopping centres, airports, and commercial buildings.

Moving Walks

You will find Schindler moving walks in some of the world's busiest airports, exhibition halls, subway systems and shopping complexes. TPL has supplied 8 Schindler moving walks to The Bandaranaike International Airport; the first moving walks to be installed in Sri Lanka.

Why choose us?

- 1 Swiss Technology since 1874
- 2 Schindler present in Sri Lanka since 1987
- 3 Trusted by Sri Lanka's top companies
- 4 A team of qualified engineers
- 5 On call 24/7/365

“

We move over 1 billion people per day.

- Alfred N. Schindler, Chairman, Schindler Group

Steadfast Service

The Service & Maintenance Department at TPL aims to protect our customer's investments - maximizing the asset life cycle by being a reliable partner over the whole building life cycle. TPL have developed a committed preventive maintenance program for its elevators and escalators that will keep customer's equipment running safely and reliably.

Service agreements with 24 hour coverage

Schindler service team equipped with specialized tooling, machinery, electronic hardware and diagnostic software

Factory trained service team with specialized breakdown assistance

Fleet of service vehicles to support you islandwide

Spare Parts

TPL services are backed by:

1

Genuine Schindler spares

2

Ex-stock spare parts

“

All genuine Schindler products supplied by TPL are backed by the Schindler warranty. We are the only company authorized to carry out warranty repairs on Schindler products in Sri Lanka.

- Rohan M. Fernando, Chairman, TPL

TPL operate a comprehensive spare parts department at its Head Office and warehouse complex in Malabe. According to Schindler guidelines, TPL stock all fast-moving spare parts as well as other key components that may be required during an emergency situation.

Independent Quality Department

At Schindler, there is no priority higher than the safety of those who travel on our equipment. As part of an ongoing commitment to passenger safety, Schindler has embarked on a global safety program known as "Confirmation of Periodic Safety Inspections" (CPSI) to ensure that 100% of passenger lifts officially maintained by Schindler and its exclusive distributors are certified as safe.

What is CPSI?

CPSI means "No compromise on safety". In addition to observing all relevant codes and regulations, TPL now proactively carry out this annual safety test and sign off that 100% of the lifts maintained comply with applicable internal and external safety standards - an industry first.

CPSI is a seven step process comprising over 70 individual tests and checks on key elevator components including:

- Machine brake
- Landing doors
- Car door electrical contacts
- Safety gear and speed governor
- Hoist way slow down speed monitoring devices
- Safety circuit
- In-car communication devices

In Sri Lanka, every Schindler elevator maintained by TPL is inspected annually by a specialized in-house quality department that is independent of the field operations team. An international audit team from Schindler's Head Office in Switzerland also carry out an audit on a random sample of Schindler elevators, to ensure quality and safety.

All Schindler engineers who carry out the CPSI tests are 'Schindler-certified' after a stringent training and assessment program. Only those technicians who obtain a satisfactory pass are authorized to carry out the tests.
